

Convert data into an arff file using R

1. Sometimes, it is not easy to import csv file to Weka.
2. Weka likes arff data files.
3. Online arff data file converter does not work well.
4. **Preparation:**
 - install both R and Rstudio on your computer
 - Install Java on your computer

```
#import dataset and save it as df  
#install package  
install.packages("RWeka") #only install it once  
library(RWeka)  
write.arff(df, file = "data file name.arff")
```
